Community Review Guide

Community Review is from June 21st to June 24th 24:00 UTC+8.

The community liaison must complete the community review on time according to the requirements. If the community review results are not submitted within the specified time frame, the project will not proceed to the committee review stage and will not be selected.

Only students who have passed the mentor, community, and committee review will be recognized as selected project students.

Community Account Login

Please log into the community account and enter the [Project and Review] interface.

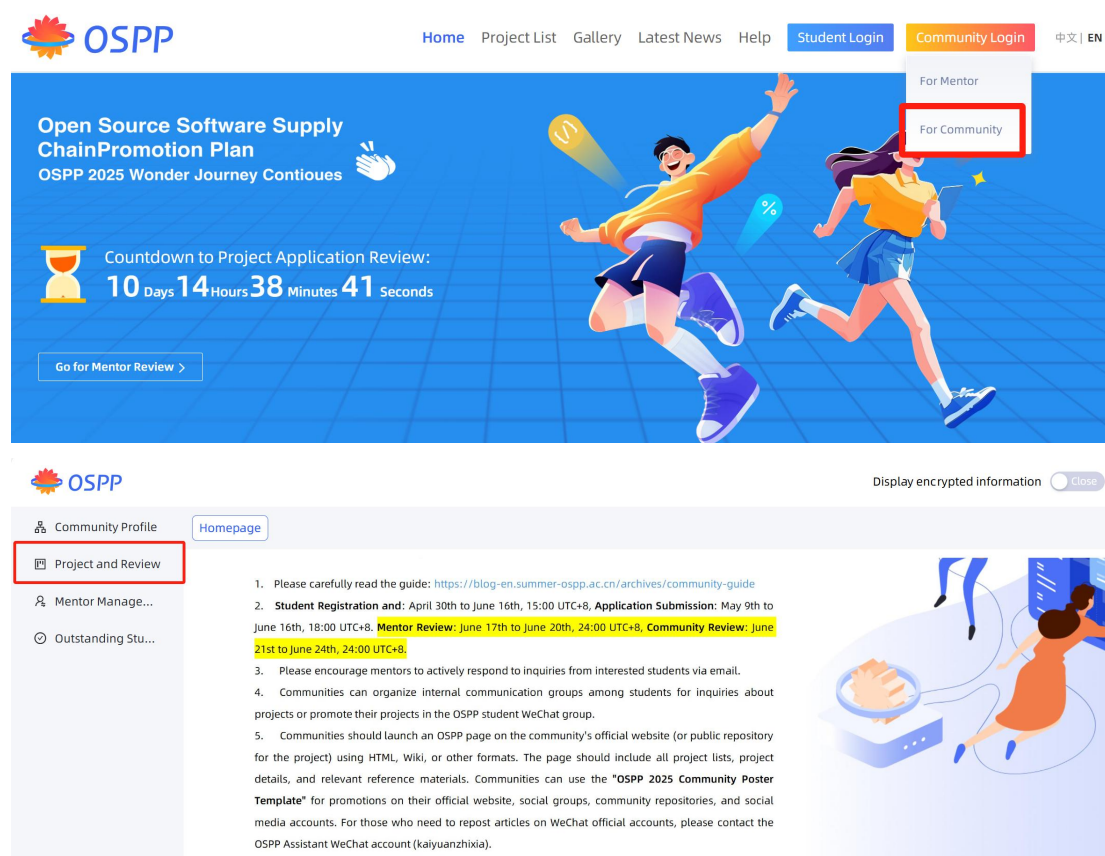

Community Review

Click the [Review] button on the right side of the page. Enable the [Enable a higher

priority to display encryption information] option at the top right to view the full information of the student.

Carefully review the student project application and resume. According to the project's review standards and community needs, fill in the review comments, and select either to approve or reject the project. If rejecting the project, provide the reasons for rejection in the review comments.

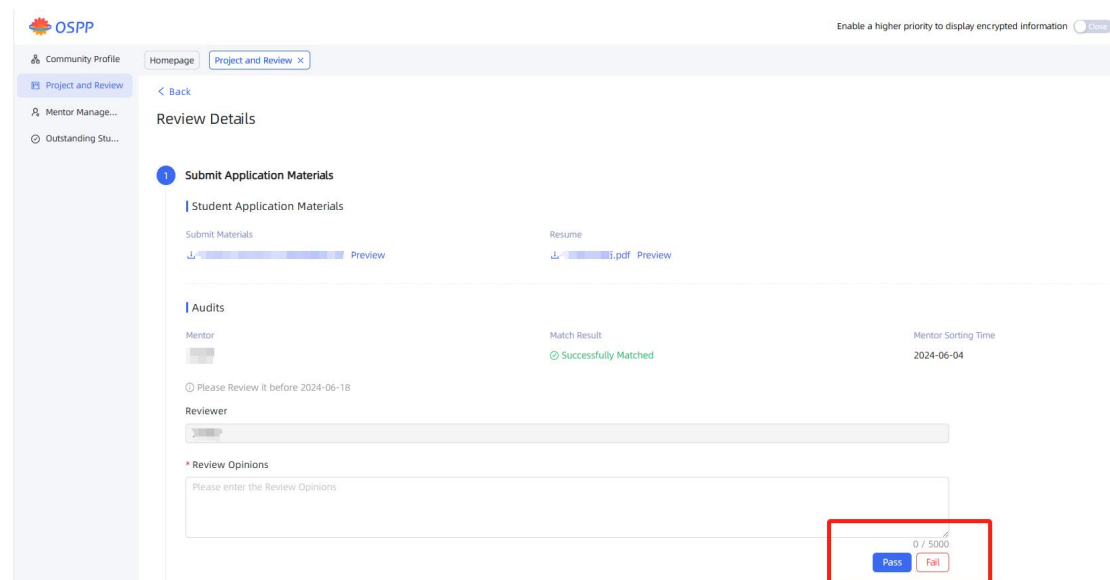

Submit Review Results

After completing the review of all projects, click the [Submit] button in the [Project and Review] interface to submit the results. Once successfully submitted, the button will change from blue to gray.

Projects for which review results have not been submitted will not proceed to the committee review stage.
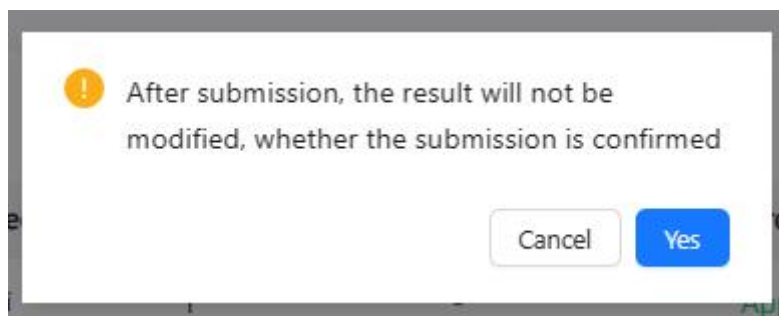

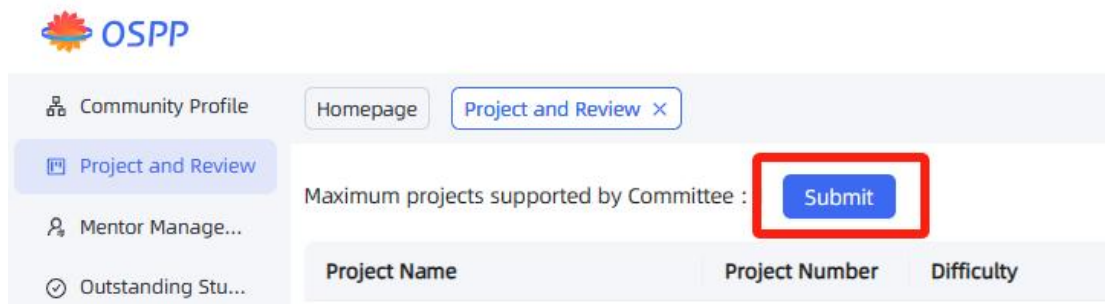

Change Review Status

Before submitting the review results, the community can change the review results by clicking the [Change Review Status] button on the review details page. After clicking the [Submit] button, review results cannot be modified.
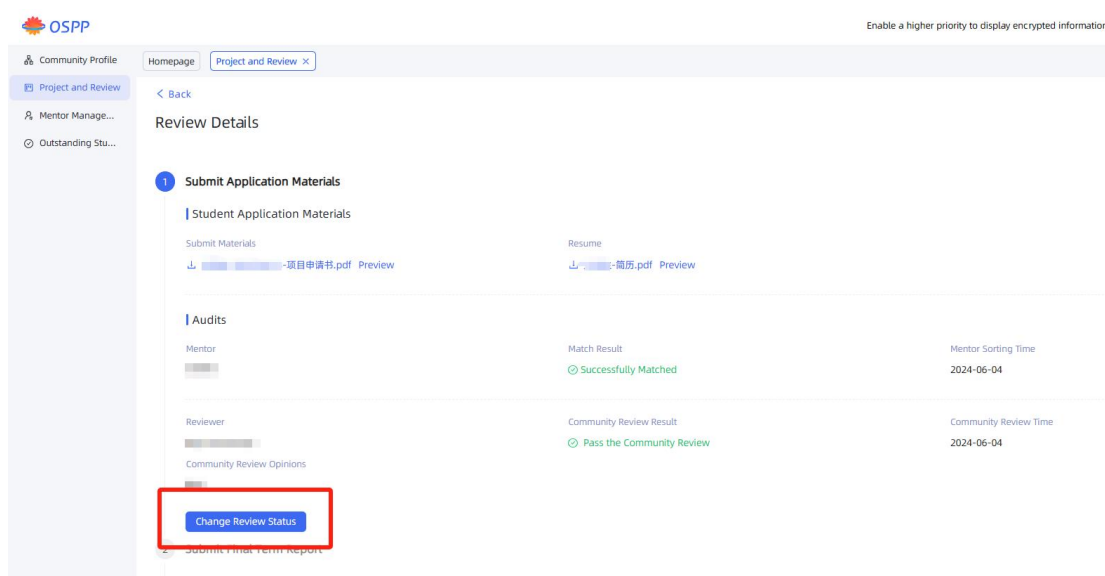

Review Requirements:

- **The quality of the project application is the main criterion for evaluating whether the student's application is approved.**

- The community review will be conducted after the mentor review. Before the community review, the community should communicate with the mentor and student, understand the project application and review status, organize internal discussions within the community, and determine the final community-approved project application among the applications approved by the mentor. The number of projects approved by the community review should not exceed the number of supported projects X informed by the organizing committee.

- For detailed information, refer to the Community Guide:

  https://blog-en.summer-ospp.ac.cn/archives/community-guide

Community-Supported Projects

If the number of projects approved by the community exceeds the number of projects supported by the committee, the community must sign a partnership agreement with the committee to increase the number of approved projects as community-supported projects.

The community should set the [Support by Community] button to [Yes] for community-supported projects in the system. Click the [Download Support Agreement] button to download the template and add signatures and stamps. Before the community review deadline on June 18th, click the [Upload Support Agreement] button to upload the scanned copy of the signed and stamped agreement into the system.

If the community decides to add community-supported projects but cannot upload the signed and stamped agreement within the specified time, please email the organizing committee at org@summer-ospp.ac.cn explaining the situation.
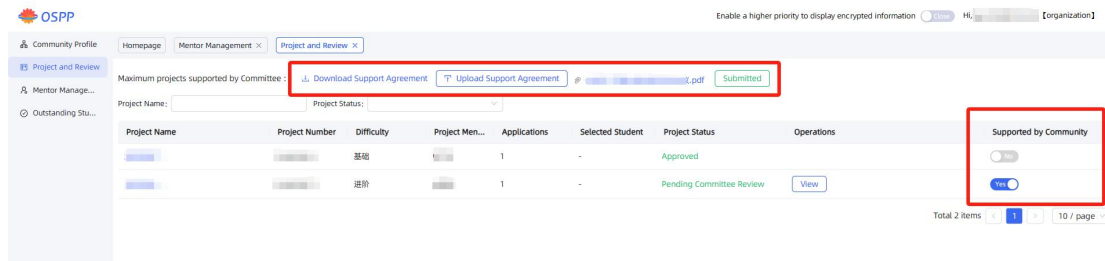

Notifications:

- If the number of projects approved by the community review exceeds the number of organizing committee-supported projects X, the community needs to sign a community cooperation agreement with the organizing committee and increase it as a community-supported project. The community will provide the bonus and tax for community-supported projects.

- Before the accepted students are announced, the community should sign the Community Cooperation Agreement, which should specify the quantity, name, difficulty, and bonus amount of the supported projects.

- The community shall provide the specified project completion bonuses. The bonus amount must comply with the activity rules and be entirely used to pay the specified project completion bonuses and taxes. If a supported project is not completed, the community does not need to pay the support funds for that project. The actual support amount will be determined based on the "Community Completed Projects List" issued by the committee after the completion project announcement.

- For detailed information, refer to the Community Guide: https://blog-en.summer-ospp.ac.cn/archives/community-guide

Notes for Community Review

- According to the rules of the OSPP, after students' project applications pass the community review, they still need to be approved by the organizing committee to confirm the selection. The selected student's application will be announced on the

website. We kindly ask all community liaisons to ensure the quality of the application.

- If the community decides to add community-supported projects but cannot upload the signed and stamped agreement before the deadline, please email the organizing committee at org@summer-ospp.ac.cn explaining the situation.
